PVC Decking Board

Smart Innovative Building Material

Benefits

PVC decking boards have a 15 years plus lifespan and unlike some other wood-alternative decking materials, PVC decking is not made with any wood. It is made completely from plastic instead of from a combination of materials.

PVC decking offers the most significant fade, stain, and mold resistance among decking products. The products are marketed as low-maintenance and are typically easy to clean and maintain. PVC decking typically doesn't require staining, sanding, or painting. PVC decking is sometimes partially composed of recycled plastic material, making it an environmentally friendly, efficient use of resources. The product is significantly lighter compared to wood composite products.

Dimensions

HOLLOW BOARD

- 18FT L X 5.5" W X 1" THICK **\$360.00**

SOLID BOARD

- 16FT L X 5.5" W X 1" THICK **\$375.00**

Colours

- Brown
- Teak
- Coffee

Colours :

- Dark Brown
- Light gray

Additional Items:

- 7ft L x 2" W Joist **\$125.00**
- Clips & Screws for Deck Board (10 pack) **\$35.00**

PVC decking was introduced to the market around 2005 and continues to be a contender as a top deck building material. Its uniquely all-plastic makeup makes it distinctly different from wood decking or other composite decking options. PVC decking has changed in appearance since its introduction and is now available in different colors.
